# EMS COT DOES THE HEAVY LIFTING

*Paramedic David Vincent (left) and Firefighter/Paramedic Ben Grace demonstrate the hydraulic lift to raise or lower patients.*

**What is It?**

Stryker Power Pro XT Emergency Cot

**Use:**

The hydraulic cot raises and lowers patients between heights of 14" to 41." This advanced system reduces strenuous lifting for medics and provides a more comfortable ambulance loading experience for patients.

**How It Works:**

The medic pushes a button to raise the battery-powered hydraulic lift. At 36" above the the ground, the cot is at the proper height to slide, head first, into the back of the ambulance. The legs of the unit automatically retract beneath the cot as it is loaded.
